BASIC-ABSTRACT:

NOVELTY - The data and operation program regarding help list, are stored in memory beside personal computer (2). When help list is demanded from facsimile side, the help list is transmitted to facsimile side from memory; only after confirming the connection between personal computer and facsimile (1) based on indication signal. When power supply to personal computer is cut, the help list is retrieved from facsimile.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for memory for storing help list data.

USE - For facsimile connected to personal computer, with help list retrieval

control function.

ADVANTAGE - The retrieval of help list from memory is performed quickly and hence facsimile communication efficiency is improved.

DESCRIPTION OF DRAWING(S) - The figure shows perspective diagram of facsimile and personal computer.
